

**Warning System Exercise
Group 2 Problem
Hypothetical Terrorist Attack**

At some future date (unspecified), several packages containing a white powder are discovered within nine different offices located in the City and County Building (Court House) in downtown Denver, Colorado. Preliminary testing on one indicates possible anthrax. All building occupants are evacuated, undelivered mail is secured, and the building is searched for suspicious packages. Identify seven community agencies that might have participated in the warning system (one agency for each of the seven functions).
