

Table of Contents

Acknowledgments	i
Note to Users	ii
About the Instructor.....	iv
Syllabus.....	vi
Introduction.....	viii
Chapter 1. Floods and Floodplains	1-1
Chapter Overview	1-1
Floods in the Human Existence	1-1
Creation Myths	1-1
Deluge Myths	1-1
Of Floods and Floodplains	1-2
Issues and Situations	1-8
Floodplain Development and Use.....	1-9
Selected Statistics.....	1-10
Floodplain Management.....	1-11
You and Floods	1-11
Communication.....	1-11
Chapter Homework Assignment.....	1-12
Field Trip Structure.....	1-12
Chapter 2. Types of Floods and Floodplains	2-1
Chapter Overview	2-1
Surface Water Runoff	2-1
Riverine Flooding	2-2
Overbank Flooding.....	2-2
Flash Floods.....	2-4
Dam and Levee Failure.....	2-7
Alluvial Fans.....	2-8
Ice Jam Flooding	2-10
Moveable Bed Streams	2-12
Urban Drainage	2-12
Ground Failures.....	2-14
Mudflood and Mudflows	2-14
Subsidence	2-16
Liquefaction.....	2-16
Fluctuating Lake Levels	2-16
Coastal Flooding and Erosion	2-17
Floodwater Damage to Structures.....	2-20
“Floodwater” versus “Storm water”	2-21
Chapter 3. Evolution of Policies and Approaches to Address Flooding.....	3-1
Chapter Overview	3-1
Chapter 4. Flood Risk Assessment.....	4-1
Chapter Overview	4-1

Hazard Identification	4-1
Vulnerability	4-1
Risk Assessment	4-2
Timing of Floods	4-2
Sources of Information for Determining Flood Risk.....	4-4
Determining Flood Probability	4-4
Hydrological Computational Processes	4-4
Statistical Analysis of Stream-Flow Records	4-5
Regional Methods.....	4-7
Transfer Methods	4-19
Unit Hydrograph Technique	4-19
Empirical Equations	4-20
Watershed Modeling	4-23
Selecting a Hydrological Method	4-23
How Good are Flood Estimates?	4-28
Chapter Homework Assignment.....	4-30
Chapter 5. Delineating Flood-Prone Areas.....	5-1
Chapter Overview	5-1
Detailed Engineering Studies.....	5-1
Energy Losses in Open Channel Flow	5-1
Friction Head	5-2
Mannings' Equation	5-2
Channel and Floodplain Characteristics	5-3
Mannings' Roughness Coefficient	5-7
Basic Computational Methods.....	5-8
Computer Modeling	5-9
Delineating Floodplains	5-14
Historic Flood Data.....	5-17
Aerial Photography	5-17
Sketching.....	5-17
High-Water Marks.....	5-17
Topographic Maps	5-18
Detailed Soil Maps.....	5-18
Floodways	5-19
The Natural Floodway	5-19
Floodway Encroachment	5-20
The Regulatory Floodway	5-23
Factors in Floodway Selection	5-24
Locating Floodway and Floodplain Boundaries on the Ground	5-29
Coastal Flooding	5-29
Some Concluding Points on Flood Risk Assessments	5-32
Chapter Homework Assignment.....	5-34
Chapter 6. Utilizing Information from Flood Hazard Studies	6-1
Chapter Overview	6-1
Sources of Studies.....	6-1
TVA, Corps, USGS, SCS, et al	6-1
Flood Insurance Studies	6-2
Flood Insurance Study Contents	6-2
Flood Hazard Boundary Maps.....	6-2
Flood Insurance Study Reports	6-3
General Map Features	6-10
Coastal High Hazard Areas.....	6-31
Special Map Features	6-32

Flood Insurance Zones	6-34
Reconciling Report Data, Profiles, and Maps.....	6-35
Ground Sites and Flood Maps.....	6-35
Determining Stream Distance	6-36
Flood Elevations from Map Data.....	6-38
Chapter Homework Assignment.....	6-40

Chapter 7. Flood Damage Reduction Strategies and Tools 7-1	
Chapter Overview	7-1
Introduction	7-1
Modify Susceptibility to Flood Damage and Disruption	7-2
Floodplain Regulations	7-4
Development and Redevelopment Policies	7-7
Disaster Preparedness.....	7-9
Disaster Assistance.....	7-9
Disaster Recovery.....	7-9
Floodproofing	7-10
Flood Forecasting and Warning Systems and Emergency Plans	7-12
Modify the Impact of Flooding on Individuals and the Community	7-13
Information and Education	7-13
Flood Insurance	7-14
Tax Adjustments.....	7-15
Flood Emergency Measures	7-15
Post-Flood Recovery	7-16
Modify Flooding	7-16
Dams and Reservoirs.....	7-16
Dikes, Levees, and Floodwalls	7-17
Channel Alterations.....	7-17
High Flow Diversions	7-18
Land Treatment Measures	7-18
Onsite Detention Measures	7-18
Shoreline Protection Measures	7-18
Chapter Homework Assignment.....	7-20

Chapter 8. Floodplain Natural Resources and Functions 8-1	
Chapter Overview	8-1
Introduction	8-1
Natural and Beneficial Floodplain Resources and Functions	8-4
Water Resources	8-4
Biological Resources.....	8-6
Societal Resources.....	8-9
Wetlands	8-11
Classification of Wetlands and Deepwater Habitats in the United States.....	8-13
The Classification System	8-14
Marine System.....	8-17
Estuarine System	8-17
Riverine System.....	8-18
Lacustrine System	8-22
Palustrine Syystem	8-24
Definition of Classes.....	8-28
Obtaining Wetland Data	8-31
Interpreting Wetland Data.....	8-32
Forces Changing Wetlands	8-36
Coastal Dunes and Barrier Islands.....	8-37

Homework Assignment	8-40
---------------------------	------

Chapter 9. Strategies and Tools to Maintain or Restore Floodplain Resources.....9-1

Chapter Overview	9-1
Introduction	9-1
Vulnerability of Natural Floodplain Resources	9-2
Strategies for Managing Floodplain Natural Resources.....	9-2
Tools for Managing Floodplain Natural Resources.....	9-5
Regulations to Protect Floodplain Natural and Cultural Resources.....	9-7
Federal Regulations	9-8
State and Local Regulations	9-9
Development and Redevelopment Policies and Programs	9-9
Information and Education	9-12
Tax Adjustments.....	9-14
Administrative Measures	9-15
Beach Nourishment and Dune Building	9-15
Conclusion	9-15
Chapter Homework Assignment.....	9-16

Chapter 10. The National Flood Insurance Program10-1

Chapter Overview	10-1
History.....10-1	
How the National Flood Insurance Program Works.....	10-2
The Emergency Program	10-3
The Regular Program.....	10-3
NFIP Floodplain Management Standards	10-4
Community Rating System	10-5
Flood Insurance Zones Revisited.....	10-8
Insurance Coverage, Limits, Rates, Purchase Requirements.....	10-11
Coverage	10-11
Limits of Coverage.....	10-12
Insurance Rates.....	10-12
Purchase Requirements	10-13
Impacts of the NFIP on Floodplain Management and Flood Damage Reduction.....	10-16
Effects of Non-Participation in the National Flood Insurance Program	10-18
Chapter Homework Assignment.....	10-19

Chapter 11. Legislative Acts and Executive Orders Pertaining To Floodplain Management11-1

Chapter Overview	11-1
Significant Legislative Acts	11-1
Regulation of Activities in Public Waters	11-1
National Historic Preservation Act of 1966.....	11-2
Wild and Scenic Rivers Act of 1968.....	11-3
National Environmental Policy Act of 1969	11-4
Coastal Zone Management Act of 1972	11-5
Endangered Species Act of 1973.....	11-5
Coastal Barrier Resources Act of 1982.....	11-6
Disaster Relief Act of 1974, Amendments, and Subsequent Acts	11-8
Executive Order 11988 – Floodplain Management.....	11-8
Chapter Homework Assignment.....	11-17

Chapter 12. Legal Framework and Ethical Issues	12-1
Chapter Overview	12-1
Drainage Law	12-1
Common Enemy Doctrine	12-2
Civil Law Doctrine.....	12-3
Reasonable Use Doctrine.....	12-3
Tennessee Courts.....	12-4
Summary	12-5
Floodplain Management Regulations	12-19
Constitutional Issues	12-19
Summary	12-21
Ethical Issues in Providing Professional Services	12-22
Chapter Homework Assignment.....	12-23
Chapter 13. Regulatory and Design Standards for Reducing Losses 13-1	
Chapter Overview	13-1
Introduction	13-1
Flood Loss Reduction Standards	13-1
Design Standards	13-1
Performance Standards	13-5
Model Codes and Standards.....	13-5
Protection of Natural Resources	13-7
Chapter Homework Assignment.....	13-10
Chapter 14. River Corridor and Watershed Management..... 14-1	
Chapter Overview	14-1
Designation of River Corridors.....	14-1
Multi-Objective River Corridor Management	14-3
Interest in Multi-Objective River Corridor Management.....	14-3
Why Multi-Objective River Corridor Management?	14-5
Impediments	14-9
Keys to Success.....	14-11
Conclusion	14-12
Tennessee and Other Statewide River Assessments.....	14-12
Watershed Management	14-14
Practicing the Watershed Approach.....	14-15
Some Final Thoughts	14-16
Chapter Homework Assignment.....	14-18
Chapter 15. Commonly Applied Floodplain Management Measures15-1	
Chapter Overview	15-1
Land Use Regulations for Floodplains, Wetlands, and Urban Drainage	15-1
Zoning Ordinances – A Primer.....	15-1
Floodplain Zoning Ordinances	15-3
Subdivision Regulations	15-4
Wetland Regulations	15-4
Urban Stormwater Management.....	15-7
Flood Warning and Preparedness Systems	15-8
Flood Warning Systems	15-8
Warning Dissemination.....	15-12
Preparedness Plan.....	15-12
Acquisition	15-13
Advantages of Acquisition.....	15-13

Disadvantages of Acquisition.....	15-15
Situations That Favor Acquisition.....	15-16
Relationship to Other Floodplain Management Methods.....	15-17
Acquisition Approaches and Techniques.....	15-19
Potential Sources of Assistance in Acquisition.....	15-20
Chapter Homework Assignment.....	15-26

Chapter 16. Structural Adjustments to Flood Risk 16-1

Chapter Overview	16-1
Dams and Reservoirs	16-1
Dikes, Levees, and Floodwalls	16-4
Channel Modifications	16-8
Channel Geometry Modification	16-9
Energy Loss Reduction	16-10
Diversions	16-11
Shoreline Protection Measures.....	16-14
Shoreline Armoring.....	16-14
Artificial Beach Nourishment.....	16-16
Floodproofing	16-16
Elevation	16-17
Barriers.....	16-18
Dry Floodproofing.....	16-20
Wet Floodproofing	16-20
Sewer Backup and Basement Protection	16-21
Floodproofing Science	16-23
Limitations and Problems with Application of Floodproofing Measures	16-38
Chapter Homework Assignment.....	16-39

Chapter 17. Developing and Implementing a Local Floodplain Management Program 17-1

Chapter Overview	17-1
Community Action	17-1
Program Development	17-1
Selection of Measures	17-2
Problems Involving Implementation, Administration, or Maintenance Of Specific Measures	17-4
Involving Property Owners	17-4

Chapter 18. Equipping the Next Generation..... 18-1

Selected References..... SR-1
