### Course Description:

This 4-day course covers foundational concepts in disaster recovery and the latest guidance on recovery planning. Participants will either assess their own recovery plan or a sample against this national planning guidance. Following that, participants will discuss how a disaster recovery effort can be organized, managed, and led along with the types of challenges faced by recovery managers. Scenario activities throughout the course give participants the opportunity to target information strategies, address local capabilities and challenges, and analyze experiences from Joplin, Missouri. The capstone activity is meant to apply all of the knowledge acquired in the course, through further examination of all of the elements of a pre-disaster recovery planning document in the context of a realistic recovery scenario.

### Course Goals:

- To increase participants' understanding of local responsibilities and challenges associated with disaster recovery.
- To provide a forum for discussion of "lessons learned" in disaster recovery at the local level.
- To prepare participants to develop and implement a pre-disaster recovery plan.
