

Warning System Exercise
Group 2 Problem
Tornado

In May, 1999, residents of Moore, Oklahoma, and numerous other near-by communities experienced a series of tornadoes resulting in 41 deaths and extensive damages, i.e., over 1,500 buildings destroyed (see Student Handout 4-1, pp. 2-3). Identify seven community agencies that might have participated in the warning system (one agency for each of the seven functions).

1. Detection:
2. Measurement:
3. Collation:
4. Interpretation:
5. Decision to Warn:
6. Message Content:
7. Dissemination:
