LESSON 2. COMMUNICATING WITH THE WHOLE COMMUNITY
This page intentionally left blank.
Lesson 2. Communicating With the Whole Community

LESSON OVERVIEW AND OBJECTIVES

Visual 2.1

Key Points

This lesson presents strategies for ensuring that you communicate effectively with the whole community, including those with access and functional needs.
LESSON OVERVIEW AND OBJECTIVES

Key Points

At the completion of this lesson, you should be able to:

- Analyze your community to identify groups requiring consideration when preparing and delivering communications.
- Identify factors that impact communication requirements.
- Identify strategies for communicating effectively with the whole community.
- Identify aspects of communicating with respect.
Communicating effectively with your community means communicating with the whole community. Communities are diverse. They include people of all ages and varied cultural backgrounds, individuals with disabilities, and people with other access and functional needs such as limited English proficiency or literacy limitations.

How can you successfully communicate with such a diverse audience? The first step is to know your audience, including any factors that may impact how you communicate with them. Once you understand your audience, you will be better able to communicate in a way that takes advantage of their communication strengths.

Be sure your messages are clear and understandable. This benefits your entire audience.

Next, tailor your message delivery to the needs of the community, especially those with sensory disabilities or language limitations. One way to tailor your message is to provide information in multiple formats so that accessing it does not depend on a single sense or ability of the user. Another approach is to translate materials into multiple languages at appropriate reading levels.

It is important to be sensitive to cultural differences in the way we communicate, including nonverbal cues, and to communicate in a way that bridges those differences.

Next, consider ways to get your message out that will enhance the likelihood of its being received by specific populations. Teaming up with organizations in the community can help.

And finally, communicating with respect will improve your ability to reach the whole community, including those with disabilities and other access and functional needs.
In emergency management, communication responsibilities are typically quite varied. Your responsibilities may include:

- Educating the community on emergency preparedness.
- Keeping people informed about emergency plans, issues, and events.
- Issuing alerts and warnings.
- Providing accurate information during incidents.
- Sharing information with response partners.
- Engaging the community in dialogues about disaster recovery.

Your target audience can be described generally as "everyone who can benefit from the information."

Although up to this point we have focused primarily on oral communication skills, you have a wide variety of communication tools at your disposal, including, among others:

- Print-based materials.
- Web-based content.
- Broadcast media (television and radio).
- Telephone and face-to-face interaction with individuals.
- Large-group forums such as public meetings.
- Social media.

We'll look more closely at the various communication media in the next lesson. For now, let's consider ways to ensure that your message—regardless of the medium—is appropriate for the whole community.
Communities include people of all ages, diverse cultural groups, and individuals with access and functional needs. Access and functional needs are factors that impact an individual’s access to information and needed programs and services. These factors include, but are not limited to:

- Disabilities that impact hearing, vision, speech, cognitive processing, and mobility.
- Limited English proficiency.
- Literacy limitations.

The U.S. Census Bureau reports that over half the population has some type of access or functional need, and almost 20 percent have disabilities. Further, they project a rapid increase in diversity. Many factors are contributing to the increasing diversity of communities. Examples of these factors include:

- The growing population of people with disabilities living in communities instead of institutional settings.
- The Baby Boom generation reaching their seniority, resulting in a growing senior population.
- Greater international migration contributing to more ethnic and linguistic diversity of the population.

It is important to know the composition of your community and to understand what that composition means for the way you communicate.

Understanding the community is not a one-time event or analysis. Because communities are constantly changing, the process must be an ongoing effort to stay in tune with the capabilities and needs of the population.
UNDERSTANDING THE NEEDS OF YOUR COMMUNITY

Key Points

To better understand the communication needs of your community, you should:

- **Understand community complexity** so you will know who your audience is. For example, learn about your community’s demographics, and educate your emergency management staff. Potential sources of information include:
  - Census information.
  - Jurisdiction profiles compiled by emergency planning teams.
  - Social service agencies and organizations.
  - Faith-based organizations and houses of worship.
  - Advocacy groups.
  - Chamber of commerce and business leaders.
  - English-as-a-Second-Language (ESL) programs.

- **Know the languages and communication methods/traditions in the community.** Consider not only what languages people speak and understand, but how they actually exchange new information and which information sources they trust. Be aware of myths and stereotypes.

- **Find out where the real conversations happen and decisions are made.** Decisions are not always made at the council level, but often at venues such as the community center, neighborhood block parties, social clubs, or places of worship. Tap into these opportunities to listen and learn more about the community. Develop strategies to reach community members and engage them in issues that are important to them.

- **Implement outreach interventions**, such as establishing relationships with multi-lingual volunteers to help interact with the various groups, and forming alliances with disability advocacy groups.
Visual 2.6 (Continued)

Formal and informal community leaders such as community organizers, local council members and other government leaders, nonprofit or business leaders, volunteer or faith leaders, and long-term residents have valuable knowledge and can provide a comprehensive understanding of the communities in which they live.
ACTIVITY: THE WHOLE COMMUNITY

Key Points

**Purpose:** The purpose of this activity is to review the importance of the whole community.

**Time:** 5 minutes

**Instructions:** Entire group:

- Your instructor will read each statement in the Student Manual and ask if it is true or false.
- Be prepared to explain your answers.

**Statements:**

- In emergency management communication, the target audience is those people who form the majority in the community.

- Access and functional needs are factors that impact an individual’s access to information and needed programs and services.

- Understanding the community can be accomplished through a one-time analysis of the jurisdiction’s demographics.
Key Points

There are four key actions that will help you communicate effectively with the whole community:

- Action #1: Ensure message content is clear and understandable.
- Action #2: Tailor message delivery to specific needs.
- Action #3: Identify alternate avenues for communication.
- Action #4: Communicate with respect.

We will look at each action in more detail.
ACTION #1: ENSURE MESSAGE CONTENT IS CLEAR AND UNDERSTANDABLE

Key Points

As a baseline, all communications should be clear, user-friendly, and age appropriate.

- Be clear. Using plain language benefits most people. Avoid jargon and acronyms, passive voice, and complex structures.

- When presenting information orally, apply the basic communication skills related to listening, nonverbal cues, voice, and engaging the audience.

- Identify your audience, and make sure your presentation is age and education appropriate. Materials and presentations for children will not be the same as those for adults.

- Make sure the format is user-friendly, with an easy-to-follow format. Using symbols and graphics can add clarity and eliminate extra verbiage.
ACTION #2: TAILOR MESSAGE DELIVERY TO SPECIFIC NEEDS

Key Points

Segments of the population often have specific needs that, when met, enable them to participate fully in the exchange of information.

Look, for example, at communicating with people who have:

- Sensory disabilities.
- Language or literacy requirements.
- Cultural factors that affect communication.
Key Points

Sensory disabilities include hearing, vision, speech, and cognitive disabilities, each of which can impact the process of communication.

Every individual is different. For example, a person with a vision disability may be blind or have low vision; the vision loss may have been present at birth, progressive, or caused by trauma, or might be happening gradually with aging.

Individuals with sensory disabilities may not be able to communicate their needs or ask for information, hear verbal announcements or alerts, see directional signs, communicate their circumstances to emergency responders, or understand how to get assistance due to their disability.

They may require auxiliary aids and services or language access services (such as interpreters and adapted materials) to participate effectively in communication.
ACTION #2: TAILOR MESSAGE DELIVERY TO SPECIFIC NEEDS

Key Points

A guiding principle for serving individuals with disabilities is access to effective communication.

- People with disabilities must be given the same information provided to the general population.
- Communication with people with disabilities must be as effective as communication with others.

The job aid on the next page provides information about laws protecting the communication rights of individuals with disabilities.
Job Aid: Laws Related to Accessible Communication

A number of laws have been enacted to protect the rights of people with access and functional needs. Below are examples of laws that specifically address accessible communication.

<table>
<thead>
<tr>
<th>Law</th>
<th>Provisions</th>
</tr>
</thead>
<tbody>
<tr>
<td>Robert T. Stafford Disaster Relief and Emergency Assistance Act</td>
<td>• Prohibits discrimination during disaster relief and assistance activities and extends those protections to include race, color, religion, nationality, sex, age, disability, English proficiency, and economic status.</td>
</tr>
<tr>
<td>(as amended)</td>
<td></td>
</tr>
<tr>
<td>Rehabilitation Act of 1973</td>
<td>• Prohibits discrimination against persons with disabilities.</td>
</tr>
<tr>
<td></td>
<td>• All entities that receive Federal financial assistance are required to effectively communicate with people who have communication disabilities including hearing, vision, or cognitive disabilities.</td>
</tr>
<tr>
<td></td>
<td>• Federal electronic and information technology must be accessible to people with disabilities. An accessible information technology system is one that can be operated in a variety of ways and does not rely on a single sense or ability of the user.</td>
</tr>
<tr>
<td>Americans with Disabilities Act (ADA) of 1990 and ADA Amendments Act</td>
<td>• State and local governments must give people with disabilities an equal opportunity to benefit from all of their programs, services, and activities. Requirements include ensuring effective communication with people who have hearing, vision, or speech disabilities.</td>
</tr>
<tr>
<td>of 2008</td>
<td>• Telecommunications Relay Services must be made available to individuals with speech and hearing impairments to the fullest extent possible and in the most efficient manner.</td>
</tr>
<tr>
<td></td>
<td>• Any television public announcement that is produced or funded in whole or in part by the Federal Government must be closed captioned.</td>
</tr>
</tbody>
</table>
ACTION #2: TAILOR MESSAGE DELIVERY TO SPECIFIC NEEDS

Key Points

Whether information is print-based, Web-based, or presented orally, appropriate media should be used to ensure information is communicated in alternate formats. Examples include:

- Sign language interpretation of spoken presentations.
- Video captioning.
- Downloadable large-print versions of materials.
- Braille materials.
- Web content with screen reader capability.
- Recorded narrations describing visual materials.
ACTIVITY: DO’S AND DON’TS

Visual 2.14

Activity: Do’s and Don'ts

Instructions: Entire group:

- Your instructor will read each statement in the Student Manual and ask if it is something you should do or should avoid.
- Be prepared to explain your answers.

Key Points

Purpose: The purpose of this activity is to identify communication practices you should use (and those you should avoid using) when communicating with the whole community.

Time: 5 minutes

Instructions: Entire group:

- Your instructor will read each statement in the Student Manual and ask if it is something you should do or should avoid doing.
- Be prepared to follow up the answers with a group discussion.

Statements:

- Use abbreviations and acronyms as much as possible to eliminate extra verbiage.
- Provide information in a single format to ensure that everyone has equal access to the same information.
- Recognize that not everyone with a given disability has the same communication needs.
- Use symbols and graphics to make materials more user-friendly and easy to follow.
ACTION #2: TAILOR MESSAGE DELIVERY TO SPECIFIC NEEDS

Key Points

Language and literacy factors impact the disaster experience because communication is vital to effective response activities.

Immigrants, migrant workers, undocumented workers, tourists, and exchange students may have language barriers. In addition, many individuals may have literacy barriers, including those with limited English proficiency, hearing or learning disabilities, older adults, and others. An estimated 20 percent of American adults read at or below the 5th grade level.

A 2013 study of print- and Web-based emergency preparedness materials collected from local and national sources found that half of the materials tested in the 10th grade to college range, and nearly all were above the 5th grade level.

Be sure your disaster-related materials are written at appropriate reading levels and provided in languages spoken in your community.
**Key Points**

Individuals’ cultural heritage may affect not only language, but also how they:

- Transmit and interpret nonverbal cues.
- Respond to different styles of communication.
- Interact during communication.

Such impacts may be even more pronounced in older generations. Failure to discern attitudes, beliefs, values, and rules implicit in different groups could disenfranchise some citizens and work against the community’s goal of whole community preparedness.

The job aid on the next page highlights some of the cross-cultural meanings of nonverbal cues.
Job Aid: Cross-Cultural Meanings of Nonverbal Cues

Often, when misunderstandings occur between people from different cultures, it has little to do with what they said—it’s how they said it, what they did when they said it, or even whom they said it to. Nonverbal language can have meaning that is culture-specific. Consider the following examples:

**Eye Contact**

Eye contact has different meanings among different cultures. In the United States, maintaining strong eye contact indicates that the listener is attentive and interested in the message. In some Asian cultures, looking directly into a speaker’s eyes indicates disrespect, while lowering the eyes is considered polite manners.

**Gestures**

Gestures considered as good gestures in one country may be seen as offensive in others. Examples include “thumbs up,” pointing, open-palm “stop” gesture, curling the index finger in a “come here” motion, a-OK (index finger and thumb forming a circle), finger snapping, and looking at one’s watch or wrist.

**Touching**

When, where, and how often we touch each other has cultural significance. Americans tend to touch each other less than members of many other cultures. We need to be especially sensitive to cultural differences regarding contact.

**Timing**

The timing of verbal exchanges—the pause between the conclusion of one person speaking and the other replying—is also culturally influenced. Some people interpret a long wait before a reply as lack of attention. However, in some cultures, a pause before replying indicates a polite and considered response.

**Personal Space**

Within each culture, there are expected personal distances for different types of relationships. For example, studies indicate that Americans prefer these proximities:

- Personal distance (between friends and intimates): 1.5 to 4 feet.
- Social distance (for social and business transactions): 4 to 12 feet.
- Public distance (among strangers in public): 12 feet or more.

In other cultures, these distances may be different. Nonverbal communication can be confusing when comfort zones are violated.
Lesson 2. Communicating With the Whole Community

ACTION #2: TAILOR MESSAGE DELIVERY TO SPECIFIC NEEDS

Visual 2.17

Discussion Question

Read the scenario in your Student Manual. How should Gene respond?

Key Points

Scenario: Gene has been asked to speak at a town meeting about how to be prepared for extreme temperatures. When he arrives, he notices that many in the audience are people whose families immigrated from India. During his talk, people of Indian heritage are slowly shaking their heads back and forth, whereas others in the audience are obviously engaged with the message.

How should Gene respond?
ACTION #2: TAILOR MESSAGE DELIVERY TO SPECIFIC NEEDS

Key Points

Using the strategies below, you can demonstrate that you respect generational and cultural differences among community members—and build powerful relationships as a result.

**Approach others with interest and openness.** Approach generational and cultural differences with interest, not fear or negativity. Take interest in the interests of others. You can learn fascinating things about other people if you choose to do so.

**Speak slowly and clearly.** Focus on slowing down your speech. Try not to rush your communication. Remember, it takes more time to correct miscommunication and misunderstanding.

**Ask for clarification.** If you are not sure you understand the meaning being communicated, politely ask for clarification. Avoid assuming you’ve understood what’s been said.

**Check your understanding frequently.** Check both that you’ve understood what’s been said and that others have fully understood you. Use active listening to check your own understanding (e.g., “So what you are saying is...”), and use open-ended questions to check other people’s understanding.

**Avoid generational or cultural idioms.** Language is contextual and has cultural implications. Examples of idioms include sports or other expressions, such as: “ace in the hole” and “a long row to hoe.” As a good general rule, if the phrase requires knowledge of other information—be it a game, generational event, a metaphor, or current social media—recognize that this reference may make your communication more difficult to understand, or even worse, offensive.

**Be careful of jargon.** Watch the use of TLAs (Three-Letter Abbreviations) and other language or jargon that may not be understood by others.
ACTION #2: TAILOR MESSAGE DELIVERY TO SPECIFIC NEEDS

Visual 2.18 (Continued)

Be patient. Cross-cultural communication may take more time.

Be sensitive to whether you are understood. Watch for “puzzled” looks from your audience. Most people show it on their faces when they don’t understand. Look for changes in body language.

The job aid on the next page provides some tips about learning about your community’s cultures.
Job Aid: Learning About Your Community's Cultures

It’s not realistic to become an expert on every culture that you may encounter. However, it is reasonable for you to learn about the populations that make up major parts of your community.

Take the time to learn the basic customs of the ethnic groups in your community.

- **Tune in.** Making yourself aware of key cultural and other differences that you will need to address during an emergency will help you learn what to expect of the groups and whether your message is being communicated.

- **Research.** Read news articles about the groups represented in your community. Frequently, these articles can provide good insight into the people and the behaviors that are part of their cultures. (This strategy is especially helpful when you are new to a community or are from a different part of the country.)

- **Network.** Talk to the leaders of the cultural groups in your community. You will find that most will be pleased that you care enough to make the effort and will be very willing to share key attributes of their culture with you.

- **Participate.** Many communities sponsor special days on which the various cultures represented in the community can share their food, artwork, and other entertainment with their neighbors. Take the time to attend these events. Pay careful attention to what you see and hear.
ACTIVITY: COMMUNICATING WITH THE COMMUNITY

Key Points

Purpose: The purpose of this activity is to identify whether a communication practice is recommended or not recommended when communicating with members of the whole community.

Time: 5 minutes

Instructions: Entire group:

- Your instructor will read each statement in the Student Manual and ask if the practice is recommended or not recommended.
- Be prepared to follow up the answers with a group discussion.

Statements:

- Ensure that all materials are written at approximately the 10th grade level.
- Be sensitive to cultural differences in interpreting gestures, eye contact, and personal space.
- When you don’t understand someone who has difficulty communicating, pretend that you understand so as to avoid giving offense.
- Avoid cultural idioms and metaphors that depend on familiarity with unrelated activities such as sports or social trends.
Key Points

When selecting how to communicate with and educate your community, it is wise to use multiple formats and media to reach the widest possible audience.

You should also identify distribution methods that will ensure everyone in the community gets the message. When conducting communication and education activities, include:

- Social, cultural, and religious groups.
- Advocacy groups.
- Ethnic radio and television stations that broadcast in their native languages.
- Children, to educate their parents.

And when disseminating information through public forums, be sure the facilities are accessible by those who use wheelchairs or other assistive devices.
**Key Points**

Practice basic etiquette when meeting people with disabilities and others with access and functional needs. For example:

- Do not shout at a person with a hearing disability unless asked to do so. Speak in a normal tone but make sure your lips are visible. The same holds true for people with limited English proficiency.
- When meeting someone with a visual disability, identify yourself and others with you (e.g., “Jane is on my left and Jack is on my right.”). Continue to identify the person with whom you are speaking.
- If the person’s speech is difficult to understand, do not hesitate to ask him or her to repeat what was said. Never pretend to understand when you do not.
- Place yourself at eye level with the person when conversing. Some ways to accomplish this without drawing attention to yourself are sitting on a chair or standing a little farther away to reduce the steep angle of the sightline. This is effective when interacting with all people who are sitting as well as persons with short stature.

Additional etiquette guidelines include the following:

- Find a place to sit and talk if a person has decreased physical stamina and endurance, which is preferable to standing during the entire interaction.
- Talk directly to the person with the disability, not to a person who accompanies them. Doing otherwise implies that you doubt the person’s ability to understand, which is disrespectful.

The job aid on the following pages will help you to communicate with respect.
Lesson 2. Communicating With the Whole Community

Job Aid: Using Inclusive Language

Language influences behavior. Inclusive language is a powerful ingredient for achieving successful outcomes that are beneficial for the whole community. Consider the following language guidelines when referring to people with disabilities and others with access and functional needs.

<table>
<thead>
<tr>
<th>Do's</th>
<th>Don'ts</th>
</tr>
</thead>
<tbody>
<tr>
<td>• Use <strong>people-first</strong> language. Place the emphasis on the individual instead of the disability.</td>
<td>• Avoid terms that lead to exclusion (e.g., “special” is associated with “separate” and “segregated” services).</td>
</tr>
<tr>
<td>• Use language that is respectful and straightforward.</td>
<td>• Avoid judgmental, negative, or sensational terms (e.g., brave, courageous, dumb, super-human).</td>
</tr>
<tr>
<td>• Refer to a person’s disability only if it is relevant.</td>
<td>• Avoid making assumptions or generalizations about the level of functioning of an individual based on diagnosis or disability.</td>
</tr>
<tr>
<td>• Remember that individuals are unique and have diverse abilities and characteristics.</td>
<td></td>
</tr>
</tbody>
</table>

Guidelines for Inclusive Language

The table below offers language guidelines for referring to people with disabilities and others with access and functional needs.

<table>
<thead>
<tr>
<th>Preferred</th>
<th>Avoid</th>
</tr>
</thead>
<tbody>
<tr>
<td>People with disabilities</td>
<td>The handicapped, the disabled, the impaired</td>
</tr>
<tr>
<td>An individual or person with a disability</td>
<td>Disabled person</td>
</tr>
<tr>
<td>Access and functional needs</td>
<td>Special needs, vulnerable</td>
</tr>
<tr>
<td>Deaf, hard of hearing, hearing loss, sensory disability</td>
<td>Deaf and dumb, the deaf, mute</td>
</tr>
<tr>
<td>Accessible communication, effective communication</td>
<td>Special communication</td>
</tr>
<tr>
<td>He has a speech disability</td>
<td>He has a speech impairment, speech impediment</td>
</tr>
<tr>
<td>He is blind, he has low vision</td>
<td>The blind, sight impaired</td>
</tr>
<tr>
<td>She has a mobility disability</td>
<td>She’s mobility impaired, physically challenged, crippled, an invalid, lame, differently-abled, bedridden, house-bound, a shut-in</td>
</tr>
<tr>
<td>She has… (multiple sclerosis, cancer, etc.)</td>
<td>She suffers from, is afflicted with, is stricken with, is impaired by</td>
</tr>
<tr>
<td>He uses a wheelchair, a scooter, a mobility device</td>
<td>Wheelchair bound, confined to a wheelchair, wheelchair person</td>
</tr>
</tbody>
</table>
## Guidelines for Inclusive Language (Continued)

<table>
<thead>
<tr>
<th>Preferred</th>
<th>Avoid</th>
</tr>
</thead>
<tbody>
<tr>
<td>Assistive devices, assistive technology, durable medical equipment</td>
<td>Handicapped equipment, special devices</td>
</tr>
<tr>
<td>Power chair, motorized wheelchair</td>
<td>Electric wheelchair</td>
</tr>
<tr>
<td>She sustained a spinal cord injury, has paralysis, is a spinal cord injury survivor, has paraplegia, has quadriplegia</td>
<td>She’s paralyzed, she’s a cripple, she’s trapped in her body, her body is lifeless, crippled, useless</td>
</tr>
<tr>
<td>Prosthesis, prosthetic limb</td>
<td>Fake leg, wooden leg, peg leg</td>
</tr>
<tr>
<td>He has cerebral palsy</td>
<td>He’s spastic, palsied</td>
</tr>
<tr>
<td>He has epilepsy, has seizures</td>
<td>He has spells, fits</td>
</tr>
<tr>
<td>She is a little person, she has dwarfism, he is of short stature</td>
<td>She’s a dwarf, he’s a midget</td>
</tr>
<tr>
<td>She has Down syndrome</td>
<td>She’s Downs, a Down’s kid, mongoloid, retarded</td>
</tr>

ACTIVITY: COMMUNICATING WITH RESPECT

Key Points

**Purpose:** The purpose of this activity is to identify behaviors that demonstrate communicating with respect.

**Time:** 5 minutes

**Instructions:** Working individually:

- Read the following descriptions of how people may behave when they communicate.
- Determine whether each behavior demonstrates communicating with respect.
- Be prepared to explain your answers.
ACTIVITY: COMMUNICATING WITH RESPECT

Visual 2.22 (Continued)

**Instructions:** Indicate whether each behavior is effective or not effective at demonstrating respect in communication.

<table>
<thead>
<tr>
<th>Communication Behavior</th>
<th>Effective</th>
<th>Not Effective</th>
</tr>
</thead>
<tbody>
<tr>
<td>When talking to a person with a hearing disability, speak louder than you normally would.</td>
<td>☐</td>
<td>☐</td>
</tr>
<tr>
<td>If a deaf person is assisted by a sign language interpreter, direct your comments to the interpreter.</td>
<td>☐</td>
<td>☐</td>
</tr>
<tr>
<td>When meeting someone with a visual disability, identify yourself and others with you.</td>
<td>☐</td>
<td>☐</td>
</tr>
<tr>
<td>When talking to a person in a wheelchair, remain standing.</td>
<td>☐</td>
<td>☐</td>
</tr>
<tr>
<td>When referring to people with disabilities, refer to the disability only if relevant.</td>
<td>☐</td>
<td>☐</td>
</tr>
<tr>
<td>Assume that each individual with a disability has unique abilities and characteristics.</td>
<td>☐</td>
<td>☐</td>
</tr>
<tr>

</tbody>
</table>
SUMMARY AND TRANSITION

Key Points

This lesson presented strategies for ensuring that your communication meets the needs of the whole community. You should now be able to:

- Analyze your community to identify groups requiring consideration when preparing and delivering communications.
- Identify factors that impact communication requirements.
- Identify strategies for communicating effectively with the whole community.
- Identify aspects of communicating with respect.

Lesson 3 will address effective communication in emergency situations.
