

## **California State University Maritime Academy - Master of Science in Transportation and Engineering Management with a Humanitarian Disaster Management Concentration**

The California State University Maritime Academy is offering a Master of Science Degree in Transportation and Engineering Management with a concentration in Humanitarian Disaster Management. The program is an advanced course of study in business and management fundamentals combined with specialized preparation for career advancement in the emerging field of Humanitarian Disaster Management. The Master of Science program specializing in Humanitarian Disaster Management explores today's humanitarian community, its philosophies, behavior, rapidly expanding role, and alternate ways of managing the humanitarian logistics challenge. The humanitarian system and the role of the humanitarian logistician are examined in depth in investigating the significant challenges facing those working in this field.

The program was developed for mid-career professionals in maritime and related fields who wish to further their education and employment opportunities. It is also suitable for highly motivated students coming directly from an undergraduate degree program.

The interactive, asynchronous, fully online learning format makes it convenient for working adults to keep up with courses and access the curriculum anytime from anywhere. Outstanding international faculty brings together exceptional knowledge and real life experience to provide students with the best of theory and practice. State-of-the-art technology supports the online delivery of the program, while interactive individual and group discussions and projects give students a collaborative learning environment and the chance to build enduring professional relationships. The program is set up in a cohort model whereby the cohort moves through the program together, which supports student learning and program completion.

The program provides students with 24/7 access to courses, helping them to fit learning into their busy lives and stay on track to completion. Studies support individual student interests and career goals. The all-in-one program fee includes textbooks and graduation fees in one package price.

### **Required Courses:**

Students begin with five courses in core management curriculum. They then complete four courses specific to the Humanitarian Disaster Management area of concentration. The final course, the Capstone Project, gives students the opportunity to demonstrate their learning through an extensive project suitable for practical application. Successful completion of the ten courses, at 3.0 credit hours each, is required to earn the degree.
