

Edmonds Community College – Associates Degree in Emergency Management

The online Associates degree is designed to prepare the next generation of emergency management and policy leaders with the knowledge and skills they need to improve outcomes in disasters of all types.

The Emergency Management online degree program trains adults to oversee emergency planning and training programs, coordinate disaster response and recovery efforts, and navigate the administrative and technical demands of disaster and emergency management efforts. The training is applicable to all emergency services fields, businesses, and industries, and prepares students to work in any hazard emergency environment -- natural or technological. Careful consideration is also given to help students understand related socioeconomic and cultural diversity issues, preparing them to succeed in all situations and environments.
