Lee University - BA or BS in Disaster and Healthcare Mission Management

The purpose of the Disaster and Healthcare Mission Management (DHMM) degree program is to prepare graduates to function in team management roles for Disaster/Emergency Teams and Healthcare Mission Teams.

Outcome Goals
Knowledge and skills graduates of the program will demonstrate:
1. Develop, implement, and evaluate strategic team plans for disaster management and healthcare mission teams locally, nationally and globally.
2. Collaborate with appropriate agencies focused on humanitarian healthcare assistance.
3. Manage and lead interprofessional teams assembled and dispatched to serve diverse populations requiring emergency, short-term, and long-term relief care.
4. Provide first aid and additional skills obtained through specialized training and certifications relevant to disaster management and healthcare missions.
5. Manage logistics related to disaster management and healthcare mission teams.
6. Develop and manage an effective budget and finance plan for all phases of disaster management and healthcare mission teams.
7. Use a global perspective and Christian worldview in responding to disaster and healthcare mission needs and events.
