

Massey University – Postgraduate Diploma in Emergency Management

Massey University is offering a Postgraduate Diploma in Emergency Management. Emergency Management is concerned with both disaster prevention and management. In its broadest sense, emergency management focuses on the organisation of communities to respond to disasters, to survive them, to rebuild social structures and infrastructure, and to sustain and preserve life. The Postgraduate Diploma in Emergency Management provides an advanced coursework degree that builds on core emergency management knowledge attained through industry experience and the prerequisite qualifications. It is aimed at mid to senior level emergency managers, who are interested in expanding their emergency management competencies.
