

## **Montgomery College – Associate of Science and Certificate in Emergency Preparedness Management**

Montgomery College is offering an Associate of Science and a Certificate in Emergency Preparedness Management. The programs are designed to provide students with a broad education in emergency management. The program focuses on a multidisciplinary approach to preparedness and the skills needed to organize and lead emergency management operations, and prepares students to perform in a disaster by providing the necessary skills for preparedness — mitigation, response, and recovery.

The curriculum is designed to provide students with a foundation of technical and professional knowledge needed for emergency services delivery in the fields of public service – including law enforcement, fire/rescue services, and emergency medical services, as well as students wishing to study in this field for careers in emergency management.

All Emergency Preparedness Management courses are offered through Distance Education via Blackboard.
