

New York Institute of Technology – Master of Science in Environmental Technology and Sustainability

The School of Engineering & Technology at New York Institute of Technology offers the Master of Science in Environmental Technology and Sustainability. The 30 credit Master of Science program will provide advanced training in several areas within the environmental and energy management professions. Students will learn how to apply the best methods and practices used in environmental systems for air, water, energy, and waste. In our program, you'll choose from concentrations in water resources, environmental compliance, climate change, and sustainable technology.

Many disciplines are combined in our curriculum, including engineering, environmental science, law and contamination migration. Faculty and students often collaborate on projects, which have included hurricane preparedness/resiliency for utilities, carbon footprint studies and green building design.

Required Courses (15 Credits):

ENVT 601: Introduction to Environmental Technology (3)
ENVT 605: Hydrology and Groundwater Contamination (3)
ENVT 655: Fundamentals of Air Pollution (3)
ENVT 725: Sustainability and the Environment (3)
ENGY 750: Energy and Environmental Law (3)

Project Courses (6 Credits):

ENVT 801: Audit or Design Project I (3)
ENVT 802: Audit or Design Project II (3)

New York Institute of Technology is accredited by the Commission on Higher Education of the Middle States Association of Colleges and Schools.
