New York Medical College, School of Public Health, Valhalla - Master of Public Health in Emergency Preparedness

New York Medical College School of Public Health offers a 46-credit Master of Public Health (MPH) in Behavioral Science and Health Promotion, Environmental Health Sciences, Epidemiology, and Health Policy and Management. Programs are offered either on campus or completely online.

The complex public health policies and the administrative and technological aspects of today’s healthcare systems require managers and policy makers to have a broad-based education. The on-line and on-campus program leading to the MPH in Health Policy and Management is designed to provide students with an understanding of the business, programmatic, planning and policy areas of health care and public health. The program prepares graduates for careers in a wide range of healthcare services, public health, and research settings. An individual program plan is developed for each student based on his or her previous education, experiences, and career goals.

Students will study public health law, policy, and management. They will learn the health system, its management, finances, and structure. Students also have the opportunity to specialize their area of study by combining the MPH with a 15-credit graduate certificate in emergency management. The Advanced Certificate in Emergency Management may also be taken separately.

*Students combining the MPH and Certificate in Emergency Management may be able to combine the seminar with the capstone course. Approval is required.

We also offer an Accelerated Master of Public Health degree. This degree is completed in three consecutive semesters starting each summer. The program is full-time and offered in a combined on-campus and on-line format.

Course load is as follows:

- Summer – 5 courses (15 credits)
- Fall – 6 courses plus practicum initiation (19 credits)
- Spring – 4 courses (12 credits)
- End of Spring – Comprehensive examination
