
Pierce College's HSEM Program is honored to support tribal sovereignty and governance in Emergency Management and to help build the next generation of Tribal HSEM leaders.

The Tribal HSEM Certificate was developed in conjunction with the National Tribal Emergency Management Council (NTEMC) and its numerous member-tribes and villages throughout the continental United States and Alaska.

The Tribal HSEM Certificate is a seven (7) course, 23-credit program created and instructed by emergency management professionals affiliated with Native American and Alaska Native communities. It is intended to create a common platform for Tribal Emergency Management nationally, and both tribal and non-tribal students are welcomed into this unique learning program.

Pierce College of Washington's HSEM Program was designed and is led by nationally recognized academic/practitioner-graduates of FEMA's National Emergency Management Advanced Academy (NEMAA). It offers students a balance of professional, technical, and theoretical courses and is designed to build the next generation of emergency management professionals. The Tribal HSEM program is co-led by Pierce College faculty and nationally recognized emergency management professionals in tribal communities.

Pierce College is consistently recognized as one of the nation's top military-friendly colleges and universities, with a student population of approximately 20,000 attending classes over three State of Washington campuses and its extensive online portal.

HSEM CORE Requirements: 23 Credits
