

## **Purdue University Global – Bachelor of Science in Fire and Emergency Management**

The Bachelor of Science in Fire and Emergency Management program is designed for emergency services personnel and addresses the new challenges in technology, human resource management, and fiscal responsibility. The general public and government appointees are demanding higher levels of training and education for those who lead our nation's first response teams during catastrophic disasters, terrorist incidents, and typical emergencies. This bachelor's degree is designed to empower you to pursue leadership roles that include managing all aspects of modern fire, EMS, and emergency preparedness agencies. Additionally, this program could help increase your administrative and management knowledge as well as occupational and life safety awareness. Purdue Global is recognized by the U.S. Fire Administration as an official Fire and Emergency Services Higher Education (FESHE) institution. Since 1999, FESHE leaders labored to produce, through consensus, a standardized undergraduate curriculum that is national in scope, content, and outcome. Fire-related and EMS management courses were developed for colleges and universities to use as a model when developing curriculum. All the courses share common titles, catalog descriptions, outlines, and content, which provide a national core of knowledge and competencies as suggested by FESHE. This degree program closely follows the FESHE model.

### **Program Requirements: 180 Quarter Credit Hours**

FS100	Introduction to Fire and Emergency Services
FS105	Fire Prevention Practices
