

Rosemont College - Graduate Certificate in Homeland Security

The Graduate Certificate in (GC-HLS) program provides a unique graduate level learning experience for student's seeking to add additional skills and subject matter expertise, a full graduate degree, but not seeking a full graduate degree, that prepares students to analyze, mitigate and manage the complex issues related to natural and human-made disasters in an accelerated and student centered environment. Students are current or rapidly advancing leaders from diverse homeland security disciplines including but not limited to law enforcement, fire services, emergency management, military and public health. The curriculum addresses topics such as natural and man-made disaster response, emergency management, public health issues, cyber security, psychology of terrorism, and the role of law enforcement and the military in protecting the general population. Students will examine these topics through the lens of modern Catholic social teaching, which advocates for the dignity of each human being, pursuit of the common good, protection of the poor and the marginalized and care for creation.

Upon completion of the Graduate Certificate in Homeland Security students will have the ability to:

- Apply a solid foundation of knowledge and skills to assume leadership roles in emergency management, homeland security, and/or public policy;
- Balance the relationship between security and personal and societal freedom;
- Understand the political, socioeconomic, historical occurrences and various cultural norms impacting marginalized groups;
- Utilize intelligence from humans, technology and other networks to gather and analyze data in order to protect security interests while maintaining an approach that safeguards individual freedom and dignity;
- Interpret ethical and legal issues
