Texas Southern University - Bachelor of Science Degree in Emergency Management and Homeland Security (EMHS)

The mission of the Emergency Management and Homeland Security program is to create graduates with extensive theoretical and applied knowledge in emergency management and disaster research. The nature of disasters and large-scale catastrophic events requires professionals with a background and education in dealing with natural and man-made hazards. The Bachelor of Science in Emergency Management and Homeland Security prepares students for careers in emergency management and public safety. Students will be introduced to the all-hazards approach, emergency disaster management phases, risk assessment, prevention and management, counter-terrorism, consequence management, mitigation and recovery.

Objectives:
- To provide students with a broad range of administrative skills and knowledge needed to meet the critical needs of emergency managers and administrators.
- To develop management, legal and behavioral skills for career advancement for students already working in the emergency management field.
- To create interdisciplinary relationships.
- To increase public education and awareness on emergency management.
- To provide opportunities for students to pursue careers and environment for further study.
- To prepare students with an understanding of preparation, mitigation, response and recovery of disaster.
