Tulane University – Master of Public Health in Disaster Management

Tulane University is offering a Master of Public Health in Disaster Management. The MPH in Disaster Management is designed to provide graduate study in environmental public health topics that are essential to the management of disasters. This program is specifically designed for the mid-career professional who intends a career path in the environmental or public health aspects of disaster management or emergency response. The disaster management specialty courses include a wide range of topics including the management structure and operational models unique to disasters, environmental toxicology and environmental sampling and data analyses, crisis communication, population issues and psychosocial aspects of disasters.

The Master of Public Health in Disaster Management is being offered as a distance learning program.

The MPH in Disaster Management is a 42 hour program of graduate study that includes the core elements of the public health curriculum with specialty courses focusing on disaster management. The degree consists of 18 credits of public health core courses, 18 credits of disaster management specialty courses plus 6 credits of electives. The MPH also requires the completion of a practicum and a Culminating Experience project. Mid-career students actively engaged in disaster management practice may be able to request a waiver of the practicum requirement with the proper documentation.

42 credits are required to complete this program.
