University of Central Missouri (UCM), Warrensburg - Undergraduate Certificate in Emergency Management

The Crisis and Disaster Management program at the University of Central Missouri created four stand-alone Undergraduate Certificates in 2013. Areas of study include:

• Business Continuity
• Emergency Management
• Emergency Services Management
• Environmental Hazards

The Emergency Management Certificate addresses the organization and coordination of preparing for, mitigating, responding to, and recovering from disasters – both natural and human-made. This certificate is available completely online and at the Warrensburg campus.

These hours may be applied to a bachelor of science in Crisis & Disaster Management or another bachelor's degree at the University of Central Missouri. The certificate complements many majors, including business, science, political science, criminal justice, and occupational safety.

Certificates can also assist you in preparing for professional certifications in several fields. If you already hold a professional certification, our certificates can be used to cost-effectively maintain your certification by providing the continuing professional development expected of practicing certified professionals.

Working professionals should also consider completing a certificate. CDM certificates provide up-to-date solutions addressing many of the challenges facing organizations today.
