University of Findlay - Bachelor of Science in Environmental, Safety and Occupational Health Management

The University of Findlay, School of Environmental and Emergency Management is offering a Bachelor of Science in Environmental, Safety and Occupational Health Management with an Emphasis in Emergency Management. The goal of the Emergency Management emphasis is to educate students in the art and science of emergency management so they may obtain positions at all levels of private industry and government. The program will provide students with an education founded in the science of emergency management (risk management, logistics and emergency management operations), blended with traditional liberal arts education (psychology, sociology, criminology, public policy and administration) and business education (financial controls) to provide a well-rounded graduate with the ability to manage the many aspects of natural and manmade disasters. The emphasis of the program focuses on an all-hazards approach to emergency assessment, planning, mitigation, and recovery. The following competencies are stressed throughout the courses in the program:

- Leadership
- Ethics
- Cultural Awareness
- Decision Making
- Interpersonal Skills
- Experiential learning (hands-on)
- Critical Thinking and analysis
- Team building and Team Work

The environmental, safety, and occupational health management major consists of required environmental, safety, and occupational health management courses, required math and science courses, required All Hazards Training Center (AHTC) courses, and elective courses from an approved list. Students may choose to take additional AHTC courses; however, only 1.5 hours of AHTC elective courses can be counted toward graduation. Students must participate in at least one internship, cooperative position, or cumulative experience for academic credit which allows students to gain practical on-the-job experience.

The University of Findlay is accredited by The Higher Learning Commission.
