

# FEMA HIGHER EDUCATION PROGRAM

NATIONAL TRAINING AND EDUCATION DIVISION / NATIONAL TRAINING AND EDUCATION SYSTEM  
NATIONAL EMERGENCY TRAINING CENTER · EMMITSBURG, MD

## FEMA National Training & Education System Higher Education Program *Presents*

### “SoTL Focus Group at the AERA Conference Application Opportunity”

**January 22, 2020**

**2:00 p.m. – 3:30 p.m. EST**

#### **Description:**

The Scholarship of Teaching and Learning (SoTL) Special Interest Group (SIG) is soliciting interested participants from the Emergency Management and Homeland Security higher education community to apply for a special project targeted at improving teaching and learning in the disciplines. The project includes the development of three teams that will each produce a publishable manuscript around an issue that seeks to inform the delivery of HS/EM education.

The teams will attend the American Education Research Association (AERA) conference in San Francisco, CA (April 17-21) and attend a mix of sessions that both inform the work of the group and contributes to personal professional enrichment. In addition to attending conference sessions, meetings of the teams or full group will occur through the course of the conference. Applicants must commit to conference attendance, additional team meetings, and pre and post-conference collaboration on a manuscript.

Applicants must have previous successful peer-reviewed publication in HS or EM, preferably related to teaching and learning. In addition, experience with curriculum and course development is preferred. Each team will have a lead that will determine the topic and assign roles within the work group.

In addition to an overview of this project and application process, the webinar will cover the requirements for contracting with the FEMA Higher Education Program.

#### **Presenters:**

- Dr. Carol Hackerott, North Dakota State University
- Dr. Mark Landahl, University of Maryland Global Campus
- Wendy Walsh, Higher Education Program Manager
