Tips for Evaluating Exercise Performance

Overall Tips
- Follow the HSEEP Exercise Evaluation Guidelines that help evaluators compare the exercise objectives to the actual observations and results.
- Schedule an After-Action Review (AAR) as soon after the incident as possible.
- Keep it short and focused.
- Focus on WHAT, not WHO.
- Establish clear ground rules: encourage candor and openness (this is dialog—not lecture or debate); focus on items that can be fixed; keep all discussions confidential.
- Use a skilled facilitator to conduct the AAR.

AAR Process Steps

Use the following questions to facilitate the AAR process:

1. What did we set out to do?
   - Establish the facts.
   - Determine purpose of the mission and definition of success:
     - Identify the skills from the Target Capabilities List (TCL) on which the exercise was to focus (e.g., communications, mass care, onsite incident management)
     - Identify key tasks involved.
     - Specify conditions under which each task may need to be performed (weather, topography, time restrictions, etc.).
     - Define acceptable standards for success (explain what “Right” looks like).

2. What actually happened?
   - Continue to establish the facts.
   - Participants should come to agreement on what actually happened.
   - Pool multiple perspectives to build a shared picture of what happened.

3. Why did it happen?
   - Analyze cause and effect.
   - Focus on WHAT, not WHO.
   - Provide progressive refinement for drawing out explanations of what occurred. This will lead into developing possible solutions.

4. What are we going to do better next time?
   - Solutions will arise naturally once problems are identified and understood.
   - Focus on items you can fix, rather than external forces outside of your control.
   - Identify areas where groups are performing well and that should be sustained. This will help repeat success and create a balanced approach to the AAR.
     - Areas To Sustain/Maintain Strengths:
     - Areas To Improve Weaknesses:

AAR Process Steps (Continued)

5. Are there lessons learned that should be shared immediately?
   - Identify the process for sharing lessons learned.
     - Option 1: Document the Issue, Discussion, Recommendation
     - Option 2: Document the Concept of the Operation, Results, Trends, Recommendation
   - Determine and describe the most notable successes from the incident.
   - Determine and describe the most difficult challenges faced and how they were overcome.

6. What followup is needed?
   - Be specific about actions, timelines, and responsibilities.
   - What changes, additions, or deletions are recommended to SOPs, plans, or training?
   - What issues were not resolved to your satisfaction and need further review?
