Chapter 11

General Suggestions for
Parent-Student Reunification Plans for Schools

Local community emergency management and response agencies should consult on the
district’s plan to promote a coordinated response to evacuations. This list is a starting point
for discussions between school officials and others addressing evacuation plans. Select
locations for reunification based on the following criteria:

a. The ability of school buses to safely access the area;

b. Coordinate evacuation plans and drills with school transportation officials to
address the capacity of that system to safely evacuate all students;

c. Coordinate evacuation plans and drills with school nursing and Special
Education staff to address the needs of students and staff with disabilities so as to
ensure that the reunification site is adequate for their needs;

d. The facilities are safe for students while they wait for parents to arrive (including
shelter, access to restrooms, food as appropriate, etc.);

e. Sufficient parking for parents while they check in with school authorities;

f. Sufficient number of ingress/egress points to minimize traffic congestion;

g. Test the ability of the school’s two-way radio system (including the bus
communication system) to ensure that the system is capable of operation
between the district office, the sending location, and the reunification site.

h. Consider developing Memoranda of Understanding with local community
colleges as reunification sites, as they often have all of the resources necessary to
safely conduct this process.
