

How to Disable Pop-up Blockers

Technical Recommendations for accessing Independent Study webpages:

- Use Microsoft Edge or Mozilla Firefox for your internet browser.
- Use a desktop or laptop computer.
- Disable your pop-up blocker. (Directions below)
- Clear your browsing data. (Directions available on our website under Quick Help Guide)
- Ensure current version of Adobe Reader is installed. (Free download at <https://get.adobe.com>)

Additional Information on pop-up blockers:

- Depending upon what software you have installed on your computer, it is possible that you may have more than one pop-up blocker running. Pop-up blockers are often part of your computer's browser or security settings. You may need to disable all pop-up blockers, so the online course study material on our website, <https://training.fema.gov/is>, will work properly.
- Once you are finished using our online website, you can go back into the menu to turn on the pop-up blocker again.
- If you are still experiencing issues, please check to see if you have a Google, Yahoo, Bing or another toolbar installed. These third-party toolbars frequently have pop-up blockers that need to be turned off.
- Some security and anti-virus software also may have pop-up blockers integrated into the software. You may need to turn off these pop-up blockers to enable our courses to work properly.

If you continue to experience technical issues, please contact the Independent Study Program (ISP) office at independent.study@fema.dhs.gov or 301-447-1200 with the specific error message you are receiving.

**** The following steps/pictures should be similar based upon your browser version.***

*****If you are using a work or school computer, you may need to contact that system administrator for assistance with making setting changes.***

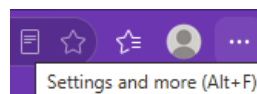

Pop-up blocking is now directly integrated into Microsoft Edge; therefore, by default, pop-up blocking is enabled. If you see a message at the top of your browser window, you will need to click on “OK”, then follow the steps below to disable all pop-up blockers for our website, <https://training.fema.gov/is>.

Important! You have a pop-up blocker turned on which means that some screens are blocked from appearing, and the application will not function properly. After you click OK, please turn off all pop-up blockers for this website.

OK

To disable pop-up blockers in Microsoft Edge:

1. Open Microsoft Edge, then select “Menu” (3 dots icon on top right corner of browser).

2. Click on “Settings”.

Settings

3. Select “Privacy, search, and services”.

Privacy, search, and services

4. Select “Site permissions”.

Site permissions
Manage permissions that are applied across all sites

5. Select “All permissions”.

All permissions
Permissions that are applied across all sites

6. Scroll down and click on “Pop-ups and redirects”.

Pop-ups and redirects

7. Under “Block (recommended)”, click the toggle button to “off” to allow pop-ups.

Privacy, search, and services / Site permissions / All permissions / Pop-ups and redirects

Default behavior

Blocked (recommended)

The browser window size may need to be larger to view all the options.

There is also an option where you can allow or block pop-ups for specific websites. Independent Study can be added to the sites that “always allow pop-ups”. Our sites would be: training.fema.gov and emilms.fema.gov.

The pop-up blocker can be turned back on when you are finished using our website by going back into the settings and following steps listed above. On step 5, click the toggle button to “on” to block pop-ups.
